Notes

- **Aged Stock:** Stock are usually culled at 11 weeks. For mice older than 11 weeks, weekly agistment charges apply.
- **Cryopreservation:** Breeding prior to freezing is not included in price. Recovery of frozen embryo or sperm includes housing to weaning.
- **Rederivation:** Breeding prior to rederivation and health screening are not included in price. Rederivation using sperm freezing/IVF is restricted to lines on C57BL/6J and FVB/nJ backgrounds, and if unsuccessful with 2 attempts the line will be rederived using the standard technique of embryo transfer and the researcher will be charged \$3049.70.
- **Production of GM Mouse Models:** Price depends on genetic modification needed. Includes genetic modification using CRISPR technology and microinjection. Please visit www.abr.org.au/services/genome-editing for more information.
- **Agistment:** Weekly holding charge includes basic husbandry except tissue collection. Technician time is charged for special procedures e.g. weighing of mice. Holding of Jackson Lab origin cages in quarantine attracts a 7.5% surcharge for ABR partners because of Jackson royalty charges.
- **Import:** Price for national import does not include courier fee or health screening. Price for international import does not include AQIS charges, courier fees or health screening.
- **Export:** Price for national export does not include courier fee. Price for international export does not include AQIS charges or courier fees.
- **Delivery:** Cost of delivery depends on the destination and number of shippers being transported.
